

Jefferson County Health Department

*2009
Annual Report*

Mission Statement

The mission of Jefferson County Health Department is to protect and promote health for all citizens of Jefferson County through the primary prevention of disease, disability and death.

The mission is accomplished by:

- ➔ Providing community leadership and active membership in partnerships
- ➔ Supporting the primary Public Health functions - assessment, policy development and assurance
- ➔ Creating policies and plans that support individual and community health efforts
- ➔ Preventing morbidity and mortality from communicable and chronic disease
- ➔ Providing educational opportunities for students
- ➔ Enforcing and complying with local, state and federal law
- ➔ Promoting and ensuring healthy environments
- ➔ Assuring Public Health preparedness and emergency response
- ➔ Educating the public about healthy lifestyles
- ➔ Providing direct services to identified populations
- ➔ Linking people to needed health services and available resources
- ➔ Compiling and analyzing data to monitor the health status of the community
- ➔ Maintaining an experienced and competent workforce of health professionals who continue to update their training and skills in the areas of community health, environmental health, communicable & chronic disease, emerging pathogens, immunizations, physical health, maternal and child health, dental health, nutrition, parenting, elderly health issues, correctional health, Public Health preparedness and community leadership

Public Health Programs and Services

Access to Care

Partnerships with:

- Community Dental Clinic
- Rock River Free Clinic
- St. Vincent de Paul
- Watertown Area Cares Clinic

Computer Access/Sign-Up for BadgerCare
Wisconsin Well Woman Program

Communicable Disease Control

Communicable Disease Case Management
Communicable Disease Prevention Education
H1N1 Response, Clinics and Education
Tuberculosis Case Management and Dispensary
Wisconsin Electronic Disease Surveillance System
Rabies Prevention & Control
Immunization Program
Wisconsin Immunization Registry
Education to Providers & Vaccine Distribution
Resource for Medical Providers
Response to food, water or disease outbreaks

Community Health Education

Health Education, Articles & Radio Interviews
Health Department Website
YouTube Channel & Loop in Clinic Area
Dissemination of Information to Community Partners
Public Information Officer in Disasters
Health Fairs

Correctional Health Program

Clinical Nursing Services in the Jail & Court
Infection Control Resource
Education of Staff & Inmates
Referral & Coordination of Services

Education of Students

School Nursing & Screening Services
Student Clinical Placement Site for:

- AHEC Interns
- Edgewood College Clinical
- Graduate Education Research Site
- UW-Madison School of Nursing Clinical
- Viterbo College Clinical

Master of Public Health Student Resource

Environmental Health Program

Agent of the State for Dept. of Health Services
Agent of the State for Dept. of Agriculture
Follow-Up on Human Health Hazard Complaints
Radon Education & Surveillance
Transient Well Water Sampling & Inspections
Beach Water Sampling
Weekly Pool Water Testing
Indoor Air Quality, Asbestos & Lead Education
Disaster, Chemical Hazards & Spill Response
Pharmaceutical Clean Sweep

Personal Care Program Services

In-Home supportive care for elderly & disabled individuals.

Community Health Assessment

Community Health Assessment Every Five Years
County Health Rankings
Provision & Analysis of Health Related Data

Healthy Lifestyles

Healthy Lifestyles Integration Grant Pilot
Healthy Lifestyles Coalition

Maternal & Child Health

Car Seat Safety & Education Program
Childhood Lead Poisoning Prevention Program
Children & Youth with Special Health Care Needs
Dental Varnish & Fluoride Program
Donated Quilt Distribution
Early Intervention & Detection of Pregnancy
Head Start Nursing Consultation
Home Visiting & Parenting Programs
Newborn Family Services
Prenatal Care Coordination
Pregnancy & Paternity Testing
Well Child Clinics
Woman, Infants & Children (WIC)

Mental Health Nursing Services

Community Support Program and Medication Management

Public Health Preparedness/Disaster Response

24/7 On-Call and Emergency Response
Southern Region Public Health Preparedness Consortium
Local Public Health Preparedness Consortium
Partnerships and Planning with:

- Fort HealthCare
- Jefferson County Emergency Management
- Dodge County Health & Human Services
- City of Watertown Department of Public Health

Pandemic Influenza Preparedness & Planning
H1N1 Response, Vaccination, Education
Mass Clinic Planning
Health Department & County Emergency Operations Plan
Continuity of Operations Plan
Preparedness Training for Staff & Management
Communications Training & Exercises
Provision of Resources for Other County Departments
Disaster Response & Mass Clinic Exercises
Health Alert Network & Epi-X

2009 – 2010 H1N1 Novel Influenza Outbreak & Clinics

2009 will long be remembered for the H1N1 outbreak and response. In April the Health Department closed an elementary school, as directed by the CDC, due to a diagnosed case of H1N1. This guidance later changed and schools were not closed unless it was decided by the schools and the local Health Officer that the absentee rate was unusually high. Jefferson County had one death related to H1N1 reported. Due to the declared Public Health Emergency and Outbreak response, many other programs and services at the Health Department were either decreased or temporarily suspended. The staff worked well together to plan and implement clinics, disseminate information, coordinate services with other providers, redistribute vaccine, target high-risk groups for vaccination and answer the numerous telephone calls from the public. The Health Department was successfully able to respond to this Outbreak by being well prepared.

Date of Initiation of Administration of Vaccine 10/12/09

H1N1 Vaccine was available daily at the Office Clinic

* = Mass Clinic

As of 05/11/10 – 8,106 total doses administered in Jefferson County as reported on WIR

2009 – 2010 Public Health

Emergency Response (PHER)

H1N1 Novel Influenza A Outbreak Response

Public Health Emergency Response – Planning

By September 30, 2009, Jefferson County Health Department will review and revise vaccination planning for Public Health-organized clinics with local and regional partners.

Public Health Emergency Response – Date Reporting

By August 1, 2010, Jefferson County Health Department will report the doses of novel influenza vaccines administered by the local health department.

Public Health Emergency Response – Communication

By August 1, 2010, Jefferson County Health Department will coordinate communication regarding the novel influenza virus with local and regional partners.

Public Health Emergency Response – Administration of Vaccine

By August 1, 2010, Jefferson County Health Department will administer and coordinate the administration of the novel H1N1 vaccine to target populations in their jurisdiction via either school-based or community clinics.

The Health Department management and staff met regularly to plan for vaccination clinics. The Health Department also met with area providers to clarify distribution of vaccine. The Director/Health Officer attended the Southern Regional WALHDAB meetings for regional planning.

The number of doses of novel influenza vaccine administered by the local Health Department was entered into the Wisconsin Immunization Registry (WIR) on a timely basis.

The Health Department coordinated communication regarding the novel influenza virus in many ways. The Health Department website was updated at least daily with information and daily e-mails were sent out to area providers, local government and governmental services, schools and Chamber of Commerce. The Health Department also held briefings with the media – sometimes on a daily basis. Health Department staff were dedicated to answering questions from the public, with 100s of calls coming in on a daily basis during the peak of the Outbreak response.

The Health Department held numerous clinics to distribute the H1N1 vaccine (please see data on clinics held and number of vaccine given). The Health Department also coordinated the distribution of the H1N1 vaccine with the Fort HealthCare Pharmacy and area clinics.

2009 Selected Program Highlights

Immunization Coalition

The Jefferson County Immunization Coalition was started by students working in their clinical placement with the Health Department. The Coalition includes area medical providers, schools, Health Department staff and representatives from Pharmaceutical companies.

Gaps in immunization coverage have been identified in Jefferson County. The purpose of developing the Immunization Coalition was to provide a forum where community providers and the Health Department can discuss and improve the current immunization practices and timely and appropriate immunization of children and adults. Through this coalition, providers will obtain updated information regarding new immunizations, immunization shortages or changes in protocols. Providers are able to network and share ideas. The goal is to improve communication, education of providers, adults and parents of children, and improve immunization rates. The ultimate goal is to stop vaccine preventable diseases.

The Immunization Coalition provided a great venue for communication and resource sharing during the H1N1 Novel Influenza Outbreak and vaccine distribution. In the future, the Coalition will analyze the childhood immunization rates and provide resources to improve the percentage of children who are fully immunized by age two.

Healthy Lifestyles Coalition Pilot Project

The Centers for Disease Control (CDC) Program Integration Project has provided Wisconsin the unique opportunity to pool and integrate resources from a number of existing programs to reduce the impact of chronic disease in the State. Two of these programs are the Wisconsin's Tobacco Prevention and Control Program (TPCP) and the Nutrition, Physical Activity and Obesity Program (NPAO).

Through this integration effort, the TPCP and NPAO have formed a partnership which not only facilitates the alignment of available resources but also enhances the benefits and opportunities for improving the health outcomes of Wisconsin residents. The result of this partnership has been the Healthy Lifestyles Coalitions Pilot Project (HLCPP).

The HLCPP focuses on community capacity building, evidence-based community outreach interventions, effective communication strategies and engaging communities with health-related disparities. The goal of the project is to enable three Wisconsin communities to develop and implement policies, systems and environmental change strategies to address chronic disease prevention within their jurisdictions. These selected communities include: Dodge and Jefferson Counties (Dodge-Jefferson Healthier Community Partnership), LaCrosse County and Outagamie County.

The three main objectives of the HLCPP in Phase I include:

- Establishing an integrated approach for a Healthy Lifestyles Coalition
- Recruiting and orientating Coalition and community members
- Developing and implementing Multi-Year Strategic Action Plans

In Phase II in 2010, the project communities will continue to build and maintain their coalition infrastructure and will implement evidence-based strategies and activities focused on a priority nutrition and/or physical activity environmental policy goal.

The Dodge-Jefferson Healthier Community Partnership held a Community Forum to showcase business, school and community based Healthy Lifestyles initiatives. Input from the Forum was used to develop a Healthy Lifestyles Strategic Plan with focus on these three main areas:

- Capacity building within its communities to include a project workgroup as the core of the coalition effort whose responsibilities include development, implementation and monitoring of the strategic plan.
- Identifying and enhancing communication with non-traditional partners to attract and engage different community groups to promote the Coalition's goals and objectives.
- Creating opportunities for program sustainability through the creation of a communications clearinghouse to provide information for local policy and environmental change efforts.

2009 Public Health Consolidated Contract Grant Report

<p>Childhood Lead Poisoning Prevention By December 31, 2009, 375 children at risk for lead poisoning who reside in Jefferson County will receive an age-appropriate blood lead test.</p>	<p><i>Prevention and elimination of lead poisoning is important to the health of the community.</i> 689 children at risk for lead poisoning were tested for blood lead levels at WIC and Well Child Clinics. 10 children had test results that were ≥ 10 ug/dL.</p>
<p>Early Intervention & Detection of Pregnancy During the 2009 contract period, all women of reproductive age who receive services through the Jefferson County Health Department will be provided with appropriate information about family planning and reproductive health, pregnancy related health and Medicaid services including the Family Planning Waiver and Healthy Start.</p>	<p><i>It is important that every woman receives quality health care and that every baby gets a healthy start in life.</i> 125 women were provided with appropriate information about family planning and reproductive health, pregnancy related health and Medicaid services including the Family Planning Waiver and Healthy Start.</p>
<p>Immunization Program By December 31, 2009, 64% of children residing in the Jefferson County Health Department jurisdiction, who turn 24 months of age during the contract year, will complete 4 DTaP, 3 Polio, 1 MMR, 3 Hib, 3 Hepatitis B and 1 Varicella vaccination by their second birthday.</p>	<p><i>Providing immunizations is a cost effective way of stopping vaccine preventable diseases. The Health Department is responsible for promoting appropriate immunization of children and adults and coordinating services with area providers. Due to the increasing complexity of the immunization schedule, it is important that parents be educated on their child's need for vaccinations.</i> 65% of children residing in Jefferson County who turned 24 months of age during the contract year complete 4 DTaP, 3 Polio, 1 MMR, 3 Hib, 3 Hepatitis B and 1 Varicella vaccination by their second birthday. The Health Department analyzed data to see why this percentage was not higher and presented the findings to all area providers at the Jefferson County Immunization Coalition meeting. The Health Department staff will increase education to providers and parents and also assure that immunizations are easily accessible to children and adults.</p>
<p>Maternal & Child Health – Well Child Clinics By December 31, 2009, 225 infants and children ages birth through five years of age who are not Medicaid eligible will receive a comprehensive primary health exam with referral and follow-up services when indicated from the Jefferson County Health Department.</p>	<p><i>Access to care is one of the three Core Functions of Public Health. The Public Health Nurses provide a comprehensive health exam, immunizations, developmental assessment, education and referrals for children and their families attending the clinics.</i> 489 infants and children ages birth through five years of age received comprehensive primary health care exams with referral and follow-up.</p>

2009 Public Health Consolidated Contract Grant Report

<p>Maternal & Child Health – Car Safety Seats</p> <p>By December 31, 2009, outcome measures will be evaluated on all children ages birth through seven years from Jefferson County Health Department who are properly positioned in a child safety seat as demonstrated by their parent or caregiver.</p>	<p><i>Infants and children who are properly positioned in car safety seats are more likely to survive an automobile crash with minimal injuries. Prevention of injuries is a priority for Jefferson County Health Department.</i></p> <p>A total of 90 soon-to-be parents, parents and caregivers of children ages birth through seven year received education, demonstration and installation of child safety seats and demonstrated competency in the use of the seats. A total of 28 car safety seats were given to parents/caregivers free of charge along with education on the proper use of the seats.</p>
<p>Maternal & Child Health – Oral Health</p> <p>By December 31, 2009, outcome measures for all assessed children ages 6 months through 6 years who receive early childhood caries prevention services will be evaluated by the Jefferson County Health Department.</p>	<p><i>Good oral health is crucial to the growth, development of children and quality of life for all. Provision of fluoride and dental varnishes, along with regular dental care, are key ways of preventing dental caries.</i></p> <p>168 children received caries prevention services including the placing of dental varnishes. 105 children received fluoride if their primary source of drinking water did not have adequate fluoridation. The Health Department works closely with area dental health care providers, including the Community Dental Clinic to assure that children receive regular dental care.</p>
<p>Well Woman Program</p> <p>By December 31, 2009, 84 Jefferson County residents ages 35-64 years will be screened through the Wisconsin Well Woman Program.</p>	<p><i>The Health Department Well Woman Program Coordinator strives to assure that all women have access to adequate screening, diagnostic and treatment services for breast and cervical cancer. Early detection is key to successful treatment of any abnormalities that are found.</i></p> <p>131 women received screening and referral services for breast and cervical cancer. The Health Department Well Woman Coordinator activities included:</p> <ul style="list-style-type: none"> • Tracking and follow-up of woman needing screening services; monthly reminders • Updating medical providers of program changes and assisting medical provider staff with completion of forms and resolution of billing issues • Working with Health Department Public Health Nurses, WWWP providers and Rock River Free Clinic for new referrals • Encouraging and assisting eligible women to enroll in the new BadgerCare Plus Core Program/waiting list • Assisting Fort HealthCare in providing vouchers for free mammograms paid for by the Fort Atkinson Memorial Hospital Foundation for women ages 40 – 49 or those not eligible for WWWP enrollment

2009 Public Health Consolidated Contract Grant Report

<p>Tobacco Control Program – Smoke-Free Air</p> <p>By December 31, 2009, three strategies in support of statewide smoke-free air policy in Wisconsin will be implemented by the Jefferson County Tobacco Free Coalition.</p>	<p><i>The Jefferson County Tobacco Free Coalition has worked for many years to pass a comprehensive state-wide smoke-free air policy in Wisconsin that would protect all people from second-hand smoke.</i></p> <p>The Tobacco Free Coalition implemented the following strategies:</p> <ul style="list-style-type: none"> • Verbal testimony by the Health Department Director and Watertown FACT students provided at the Joint Finance Committee Hearing; written testimony by the Community Dental Clinic and Uniting Latino Families; support of the state-wide smoke-free air policy by the Board of Health • 10 Cents a Day Coffee event and In-District meetings with legislators • Updated supporters from the Tobacco Free Action Network • Held a Legislative Town Hall Forum • Supported “Taverns Clearing the Air”
<p>Tobacco Control Program – Program Sustainability</p> <p>By December 31, 2009, four strategies in support of tobacco control program sustainability in Wisconsin will be implemented by the Jefferson County Tobacco Free Coalition.</p>	<p><i>The continuation of tobacco control activities has been jeopardized due to funding uncertainties.</i></p> <p>The Tobacco Free Coalition implemented the following strategies to support program sustainability:</p> <ul style="list-style-type: none"> • Verbal and written testimony at the Joint Finance Committee Hearing • 10 Cents a Day Coffee event • In-District Legislative meeting • Listening sessions about the results of cutting tobacco and control funding
<p>Tobacco Control Program – 5 Year Plan</p> <p>By August 31, 2009, a five-year community tobacco control multi-jurisdictional action plan will be ratified by the Jefferson County Tobacco Coalition membership through active participation in a restructuring strategic planning process.</p>	<p><i>A major decrease in State funding for the County Coalitions resulted in the reorganization of Tobacco Free Coalitions state-wide.</i></p> <p>The Tobacco Free Coalition participated in multi-jurisdictional plan meetings which resulted in the combination of the Waukesha, Dodge and Jefferson County Tobacco Free Coalitions.</p>
<p>Tobacco Control Program – WI Wins</p> <p>By December 31, 2009, 217 compliance investigations at licensed tobacco retail vendors, 5 related public outreach activities and 5 related media outreach activities will be completed in Jefferson County according to the prescribed schedule.</p> <p>By December 31, 2009, enforcement activities will be implemented by Jefferson County local law enforcement in collaboration with WI Wins Tobacco compliance inspections.</p>	<p><i>The Wisconsin Wins (WI Wins) campaign is an initiative designed to decrease youth access to tobacco products that also includes retailer education and training, media outreach and community education. WI Wins uses positive reinforcement to reduce illegal tobacco sales to minors. Prevention of initiation of smoking in youth is key to decreasing the number of smokers.</i></p> <p>217 compliance investigations at licensed tobacco retail vendors, 5 related public outreach activities, and 5 related media outreach activities were completed in Jefferson County. The “buy rate” was 0.8% with citations issued as appropriate.</p>

2009 Public Health

Consolidated Contract Grant Report

<p>Public Health Preparedness – Planning</p> <p>By December 31, 2009, Jefferson County Health Department will engage in a continuous planning process with local and regional partners to respond to Public Health emergencies.</p>	<p><i>The Health Department continues to work closely with local and regional partners including: Emergency Management, Law Enforcement, Fire, EMS, Fort HealthCare Hospital, Clinics, Lab and Infection Control, Jefferson County and State Voluntary Organizations Active in Disaster (VOAD) and Long Term Recovery Committee (LTR), ARES/RACES, Faith Organizations, Human Services, Chamber of Commerce, Business Community and Uniting Latino Families</i></p> <p>Examples of planning included:</p> <ul style="list-style-type: none"> • Membership on the Local Emergency Planning Committee (LEPC) • Membership and leadership to the Jefferson County VOAD and LTR • MOU with 211 • Updated the Incident Command System (ICS) Staff Roles Chart in the PHEP • Department of Agriculture Food Safety information added to the PHEP • State Expert Panel on Volunteer Management added to the PHEP • Mass Clinic Plan reviewed and updated • Coordinated information and distribution of vaccine during the H1N1 Outbreak • Met with Fort HealthCare Management and Staff during the H1N1 Outbreak • Worked with a local school district to close a school during the H1N1 Outbreak • Planned with area school districts, EMS, police and fire departments and local medical providers in the provision of H1N1 vaccine • Worked with the media to inform the public about the H1N1 Outbreak and clinics • Formed the Jefferson County Immunization Coalition (JCIC) and planned with the JCIC for Seasonal Influenza and H1N1 clinics • Presented at a Business Pandemic Preparedness Workshop • Consulted with Human Resources on H1N1 and possible staff illnesses
<p>Public Health Preparedness – Competencies</p> <p>By December 31, 2009, staff of Jefferson County Health Department will meet the appropriate competencies for their assigned emergency preparedness roles.</p>	<p><i>A competent staff is able to respond to disasters and outbreaks such as the 2008 floods and the 2009 H1N1 Outbreak. Continuous training is necessary to maintain staff competencies.</i></p> <p>An assessment and documentation of staff competencies was completed. Staff training needs were identified and a training plan was developed. The Incident Command System (ICS) Chart of Assigned Roles was updated and added to the Public Health Emergency Plan (PHEP).</p>

2009 Public Health

Consolidated Contract Grant Report

<p>Public Health Preparedness – Exercises</p> <p>By December 31, 2009, Jefferson County Health Department will participate in a mass clinic exercise (tabletop, functional or full-scale) or real event that meets the requirements set by the Centers for Disease Control (CDC), in addition to completing Performance Measures.</p>	<p><i>The Health Department has participated in numerous exercises and real events.</i></p> <p>The Health Department completed an After Action Report and Improvement Plan (AAR/IP) on the response to the H1N1 Outbreak in 2009. The Performance Measures Matrix was completed.</p>
<p>Public Health Preparedness – At-Risk</p> <p>By December 31, 2009, Jefferson County Health Department will collaborate with community partners to develop an integrated Public Health response addressing at-risk populations during Public Health emergencies.</p>	<p><i>Many community partners need to work together to assist at-risk populations during Public Health emergencies and disasters.</i></p> <p>The Health Department encouraged individuals with special needs and their families to develop family or individual based preparedness plans with resource assistance from www.ready.gov and homeland security. Activities included:</p> <ul style="list-style-type: none"> • Regular attendance at Uniting Latino Families meetings • Distribution of Preparedness literature in Spanish at the Latino Resource Fair • Provided resources at the Jefferson County Special Needs Resource Fair • Speaker at Special Connections – A support group for students, parents and siblings of students with special needs • Literature provided at the County Fair • Meetings with the Jefferson County VOAD • Close working relationship with Jefferson County Head Start, Human Services and area Long Term Care Providers • Worked with health care providers, including the Fort HealthCare system, in the provision of the H1N1 vaccine with emphasis on the at-risk population when vaccine was in short supply
<p>Public Health Preparedness – Consortium</p> <p>By December 31, 2009, Jefferson County Health Department will participate in the process of restructuring existing consortia to no more than six consortia aligning within the Department of Health Services geographic Regional Office boundaries.</p>	<p><i>In 2009, the Health Department was in the Southcentral Public Health Preparedness Consortium with Dodge, Dane, Green, Rock & Columbia County Health Departments as well as Watertown and Madison City Health Departments.</i></p> <p>Starting in 2010, the Health Department will be a part of a larger Consortium – the Southern Region Public Health Preparedness Consortium that will include the Health Departments listed above as well as Iowa, Lafayette, Grant, Crawford, Vernon, Richland, Sauk, Juneau and Adams Counties.</p> <p>The Health Department Director participated in all meetings related to the restructuring of the existing Public Health Preparedness Consortia into a single Consortium within the DH Services Regional Office boundaries.</p>

Personal Care Program

Personal Care Services include: assistance with bathing, hair and skin care, mobility and transfers including use of walker, cane or crutches, assistance with dressing and toileting, laundering the client's bed linens and clothing, housekeeping tasks, meal preparation, food purchasing and meal serving, reminding the client to take pre-selected medications, accompanying the client to obtain medical diagnosis and treatment, incidental/minimal care of client's pet and connecting the client to community resources.

Starting in September 2008, the State of Wisconsin began transferring Jefferson County Medical Assistance clients to a private, non-profit organization called Care Wisconsin, Inc. for their long term care services. In 2009, the Health Department continued to contract Registered Nurses to Care Wisconsin, Inc. The Health Department also had a contract with Care Wisconsin, Inc. for Personal Care Program Assistants who assisted the staffing agencies and coordinated services for clients funded through private pay, the Elderly Services Grant, on the waiting list or who have not chosen Care Wisconsin, Inc.

Evaluation of 2009 Goals

Complete the Wisconsin Quality Improvement Assessment and Strategic Plan for the Health Department. **Completed**

Assess the feasibility of adding a Nurse Practitioner to the Health Department staff to increase access to care for uninsured and underinsured individuals. **In process**

*Implement the Wisconsin Electronic Disease Surveillance System (WEDSS) for all reporting and follow-up of Communicable Disease cases. **Completed***

Further develop leadership roles for the Public Health Nurses as the Public Health Program Manager position will not be filled at this time. **Completed**

*Computerize all schedules, calendars and documentation. **Completed***

Continually assess for cost-saving and revenue generating measures. **Continues**

*Look for opportunities to provide a comprehensive "Healthy Lifestyles" program. **In process***

Participate in the reorganization of the Tobacco Prevention and Control and Public Health Preparedness Coalitions. **Completed**

Increase staff competencies in Emergency Preparedness. **In process**

Participate in the Jefferson County Strategic Planning process. **In process**

*Continue surveillance for communicable diseases including the H1N1 Novel Influenza virus. **Completed***

Further develop the Community Dental Clinic by increasing hours of service and efficiencies in the provision of care. **Completed**

*Provide increased leadership and visibility in the community. (examples H1N1 and Immunization Coalition) **Completed***

Work with Dodge-Jefferson Healthier Community Partnership on the Healthy Lifestyles Planning Grant. **Completed**

*Implement the Agent of the State Program for the Department of Agriculture Retail Food Establishments. **Completed***

Looking into the Future

Goals for 2010 and Beyond

- ✓ Analyze staffing needs, Health Department infrastructure, surge capacity as they relate to programs and services, including Emergency Preparedness and Immunizations, and provide adequate and appropriate staff.
- ✓ Assess the feasibility of adding a Nurse Practitioner to the Health Department staff to increase access to care for uninsured and underinsured individuals.
- ✓ Assist the Rock River Free Clinic in assessing the feasibility of hiring a Nurse Practitioner and/or a Clinic Coordinator to increase access to care for uninsured and underinsured individuals.
- ✓ Keep informed of the affect and opportunities available with National Healthcare Reform.
- ✓ Increase access to care and coordination of services by co-location of WIC and Well Child Clinics where possible.
- ✓ Continue to promote the H1N1 Novel Influenza vaccine until the 2010 Influenza vaccine is available.
- ✓ Assist area businesses and employers in the implementation of the Wisconsin Smoke-free Air law that goes into effect July 5, 2010.
- ✓ Increase outreach and education regarding appropriate immunization of children and adults.
- ✓ Continue to work with the Dodge-Jefferson Healthier Community Partnership, UW-Madison and area communities to provide a comprehensive "Healthy Lifestyles" program.
- ✓ Continually assess for cost saving and revenue generating measures.
- ✓ Increase staff competencies in Emergency Preparedness.
- ✓ Continue participating in the Jefferson County Strategic Planning process.
- ✓ Update the Health Department website and promote it as a community resource.
